

KITCHENiQ • CEILINGiQ

Dear designers,

Thank you for using ETS NORD KITCHENiQ canopy configuration tool.
Here you can find the list of our newest additions and updates in both CEILING- and KITCHENiQ

[Open KITCHENiQ here](#)

Version 2024.4.1

Updates in **KITCHENiQ** include:

- ▶ HM Watermist canopy available for selection
[Open our webpage to read more about HM canopies](#)
- ▶ Login page removed for faster access – login button now found at the top of the page
- ▶ Ozone unit location added to canopy drawing top view
- ▶ Recommended installation height from the finished floor level added to canopy sideview
- ▶ HT empty canopy now has cover plate option
- ▶ New generation DALI lights with different color options
- ▶ Thermal convection method has been updated according to the latest DW172 standard
- ▶ Canopy exterior dimensions made more noticeable
- ▶ Faster project list loading, no more performance issues on bigger lists
- ▶ Various smaller improvements

Updates in **CEILINGiQ** include:

- ▶ HCF Ceiling filler logic updated
- ▶ Various smaller improvements

PS! New HP Compact canopy for small kitchens available in the configurator soon!

Looking forward to seeing you in our **KITCHENiQ** and **CEILINGiQ**!
